Subject: Yucca Mountain

Part of Records Package / Supplement / Correction

Carol Hanlon
S&ER Products Manager
U. S. Department of Energy
Yucca Mountain Site Characterization Office

Please recommend to the Secretary of Energy and the President that this nation must move forward with Yucca Mountain as our nation's permanent High Level Waste repository.

I am a 17 year veteran of the nuclear industry, a former licensed Senior Reactor Operator, and a degreed nuclear engineer. I have been involved with plant operations, fuel design, fuel storage, and environmental issues all throughout my career. I am definitely in favor of moving forward despite the resistance of the state of Nevada and anti-nuclear political action groups. Please consider my opinion, and feel free to contact me for further details.
